

Neutrogena

#1 Dermatologist recommended

Neutrogena Skin360™ & Skin Scanner

See what your mirror can't with Neutrogena Skin360™:

the first tool featuring dermatologist-grade precision that captures, analyzes and tracks exactly what skin needs.

Precision Technology

Equipped with eight high-powered LED lights, a 30x lens and highly accurate sensors to measure moisture levels, pores and fine lines. The technology generates a unique Skin360 score that changes as skin does. Track progress over time for healthier-looking skin, helping make the invisible – visible.

Personalized Advice

Get a 360° view of your skin's status and receive real-time data, personalized advice and a customized regimen that's right for you - more than 500,000 combinations possible to help achieve your skin health goals.

Utilizes scientific imaging to analyze data/results

Creates shareable before and afters

Lasts up to 500 scans with rechargeable battery

Compares skin's health against other users

Gets up close and personal with your skin via Magnify Mode

Your Skin. Your Results.

Step 1

Slip the skin scanner over iPhone* and open Neutrogena Skin360™ app for a guided tour

Step 2

Hold the skin scanner to clean, makeup-free skin to capture forehead, outer eye, cheek and chin readings

Step 3

Snap a selfie and have the option to share skin care preferences

Step 4

View personal results and unique Skin360 score live from the app. Repeat weekly to track progress

Step 5

Receive tailored Neutrogena® tips and regimen with suggestions to improve scores and overall skin health, plus a 25% off discount**

The skin scanner beauty tool is available for \$59.99 exclusively on Skin360app.com, and the Neutrogena Skin360™ app is free to download on the iOS App Store beginning September 2018.

The health science and technology sector is ever-evolving, and we are too. Please reach out with any feedback or suggestions for how we can optimize our technology.
